D1- RTX Home Made

MODE : SSB-CW-AM

POWER and RESTRICTIONS:

As authorized by your license.

Packet Cluster not admitted.

PC on CW not admitted.

CONTEST EXCHANGE:

Reports RST + WW Locator

(examples: 5/9 JN64 or 599 KM40 or 59 JN65iv or 599 JM49kd)

Complete WWW-locator of 6 characters, if you has exchanged with 4 characters the software it completes the conversion with the addition of II (center of the square) for the calculation of the QRB. (example: 59 JN65 are automatically changed in 59 JN65II)

SCORING and FINAL SCORE:

1 POINT /QSO for every band and mode

MULTIPLIER is calculated by QRB between the two stations with a corrective per band:

On 20mtr. 1 point multiplier every 500 Km or fraction of 500 Km

On 40mtr. 1 point multiplier every 300 Km or fraction of 300 Km

EXAMPLE.: QRB 678 Km = 2 points on 20mtr / 3 points on 40mtr

QRB: 351 Km = 1 point on 20mtr / 2 points on 40mtr

Final Score = The sum of QSO-points from all bands times the sum of multipliers from all bands.
